Education

Mount Royal University – Bachelor of Science in Computer Science Sept 2021 – Present

Experience

Lead Developer, MRU Cybersecurity Club – Calgary, AB Sept 2026 – Present

- Designed and built full website for founding cybersecurity club from scratch, creating platform for member engagement, event promotion, and club information sharing.
- Developed responsive web presence enabling club to establish online community and attract new members to the newly launched student organization.

Open Source Contributor, Mount Royal University – Calgary, AB Sept 2026 – Present

- Contributing to established open source codebases through Git-based workflows, code reviews, issue tracking, and collaborative development.
- Navigating unfamiliar codebases and submitting substantive contributions including bug fixes, documentation, and feature improvements.
- Participating in code reviews and pull requests while collaborating with project maintainers and contributors.

Technical Operations Lead, Susgrainable Health Foods Inc. – Remote Sept 2026 – Oct 2026

- Designed lead management and data collection systems for brewery tradeshow partnerships, prioritizing practical, low-cost solutions with lead scoring methodology, customer workflows, and follow-up processes.
- Identified technical and operational barriers to implementation and developed realistic, scalable solutions with clear system requirements and implementation roadmap for bootstrapped startup.
- Coordinated cross-functional team to align recommendations and ensure unified messaging across final deliverables, translating complex technical concepts into actionable business strategy.

Software Developer Intern, Harmelo – Calgary, AB May 2026 – Aug 2026

- Architected multi-user admin backend for production CRM using Next.js, TypeScript, and PostgreSQL with role-based access control and permission enforcement across 18+ API endpoints.
- Created comprehensive contact management system with CRUD operations, contact deduplication, bulk CSV import/export, and activity logging with automatic Gmail sync.
- Optimized secure authentication using JWT tokens and AES-256-CBC encryption. Integrated Gmail OAuth 2.0, distributed reminder service, and tag-based contact categorization.
- Constructed employee management system with secure invite workflow. Deployed follow-up tracking with automatic status updates, per-employee KPI dashboards, and rolled-up team performance views to Vercel.

Projects

Insurance Premium Optimization System | *Python, scikit-learn, NumPy, Pandas* Class Project

- Developed a predictive model that balances insurer profitability with fair customer pricing, identifying optimal portfolios without systematically overcharging.
- Designed a constrained optimization algorithm that maximizes returns while respecting capital limits and ensuring equitable risk-based premiums.

ShopLifted | *HTML, CSS, JavaScript, APIs* Class Project

- Created a responsive e-commerce SPA with dynamic filtering (gender, category, color, size), real-time sorting, and persistent cart using localStorage and fetch API.
- Enabled smooth navigation across product browsing, detailed views, and checkout with real-time cart updates and state persistence throughout the entire user experience.

Skills

Programming Languages: Python, JavaScript, TypeScript, C, C++, Java, SQL, Assembly
Libraries & Frameworks: Node.js, Express.js, React.js, Next.js, TailwindCSS
Data Science & Machine Learning: NumPy, pandas, scikit-learn, Matplotlib
Databases & ORMs: MySQL, PostgreSQL, MongoDB, Prisma
Development Tools: Git, VS Code, Visual Studio, Eclipse, Vercel
